EAST 101 SHARP AVENUE -- SPOKANE 11, WASHINGTON

Please Read Carefully Before Ordering

ORDER EARLY—Unless specific instructions are given for later shipment we fill orders in rotation received. We sometimes get a bit behind during the rush season and the early order, of course, gets out first.

CONCERNING POSTAGE—ALL SHIPMENTS WILL BE SENT EXPRESS COLLECT UNLESS POSTAGE IS INCLUDED. 15% East of the Mississippi and 10% West of the Mississippi river. Shipments over \$10.00 in the states of Montana, Idaho, Washington, Oregon and California will be prepaid.

RESPONSIBILITY—While we endeavor to fill all orders with the greatest of care, we can accept no responsibility, either express or implied for failure with stock purchased from us as there are too many existing conditions over which we have no control. Any stock that is not received in good condition will be replaced if we are notified within 5 days after receipt of shipment. No complaints will be entertained later than this.

Asterisk (*)—All plants thus marked are suitable for the front row border, edging, rockeries, wall gardens, etc.

Sales Tax—Washington residents will please add 3% sales tax.

Cash With Order—Please send remittance with order as we do not like to ship C. O. D. It is an additional expense to you and often causes delay.

May We Substitute?—When permitted to substitute we always give extra value even if no substitute is necessary. Our collection is large and contains many items of which stock is limited and if we are sold out we appreciate the opportunity of substituting.

Correspondence—We are glad to answer questions at all times but ask that you please use a separate sheet and not include on order blank.

Canadian Shipments—Our Canadian customers must first obtain a permit from the Department of Agriculture at Ottawa. Plants will then be shipped as requested. If shipment is to be made by mail, please add 15% for postage.

NOTE—PLEASE DO NOT ASK US TO ACCEPT ORDERS FOR THREE PLANTS OF DIFFERENT KINDS AT THE THREE OF ONE KIND RATE. For instance: Many of the 35c Iris are listed at 35c each or three for 90c. The price for three different 35c Iris is \$1.05. We cannot accept orders at less than catalogued prices.

Visitors Welcome

In our display beds we have well developed specimens of practically everything listed in this catalog as well as many hundreds of other perennial novelties. This year we are growing about 400 varieties of Tall Bearded Iris, including many new ones. The first week in June is the best time to see these. In the fall we will have about 300 varieties of the finest Chrysanthemums in flower. The public is cordially invited to visit these displays at any time. We are located just one mile from the center of Spokane's business district. To reach us, go north on Division Street to Boone Avenue (Burgan's Big Store). We are just one block north and one block east of there.

Special Early Order Discount

We will allow a 10% discount from catalog prices on all plant orders received before February 25, 1948, and 5% on all orders received before March 10, 1948.

Fantail Pigeons

LIVE ORNAMENTS FOR YOUR GARDEN

Nothing is more lovely than these beautiful birds strutting about a garden. They are as proud as peacocks of their huge, beautiful tails and fairly quiver with excitement as they strut about. Their soft cooing is always delightfully soothing, and as they are not very strong flyers, due to the weight of the heavy tail, they are always close to their home which can be regulated at will. An artistically built dove cote atop a post, or a shelf placed inside an out building with a small hole cut through to let them in and out will do nicely. We can supply black, blue, red, silver, white, and mixed colors at \$5.00 a pair. Saddles \$7.50 a pair. For specimen birds write for prices.

Baby Flowering Shrubs

These are strongly rooted little plants that will quickly form specimen shrubs. Most of the flowering shrubs that are used in landscape planting are two and three year olds so you can expect rapid growth from these one year olds.

HARDY GARDEN CHRYSANTHEMUMS

CHRYSANTHEMUM (Kris-an'-the-mum)

Chrysanthemums have no equal as cut flowers. The early sorts will give good blooms by the first of July and by a judicious choice of types you may have bloom until actual freezing weather. Many sorts are impervious to light frosts. Give plenty of moisture in full sun and fertilize heavily. 3 inches or 4 inches of barnyard manure should be spaded into the soil before planting is done. A teaspoonful of bone meal and another of superphosphate may be put in the bottom of the hole when plant is set out. A monthly feeding of some good commercial fertilizer will give exhibition blooms.

WINTER PROTECTION—The best winter protection is nature's own. In other words their own tops. Never cut the old plants down in the fall. If further protection is desired use excelsior or evergreen boughs. Never use leaves, straw or other material that will smother the young new growth.

PRIMULA AURICULA

PRIMULA AURICULA—Evergreen Primrose

In the Auricula we have a primrose that may be grown with no protection whatever in any part of the country. The broad fleshy leaves are evergreen and may often be seen encased in ice in our beds but when the ice is gone they are as firm as ever. In some varieties the leaves are coated with a silvery bloom that adds greatly to their charm. The sweetly scented flowers come in a wide range of colors. They bloom both spring and fall, asking only a rich, moist soil in sun or shade. A situation affording light shade from the noon-day sun suits them best. We are offering a few named sorts from our large collection of imported varieties, grown entirely from division and guaranteed true to name.
